Continental Technologies owners Paul and Glenda Grimmer of Boulder, Colo., were here recently for a celebration at the fabrication facility on Sykes Boulevard.

The plant is located in the speculation building named "Bob." Paul Grimmer, a native of Bartlesville, had previously worked 27 years for Conoco.

He said, "With the ConocoPhilips guys moving out, we saw and still see a huge opportunity for companies like ours to step in and utilize the tremendous talent that exists around here.

"We are going to be in the community for many, many years to come. We are as excited as can be about being in the new facilities. The Development Authority has worked extremely well with us to get us going," Grimmer added.

A local company, Continental Technologies builds process equipment for research in organic and non-organic systems. The company's expertise is developing product concepts that are licensed to other manufacturers. The company is an affiliate of Eltron Research & Development of Boulder, Colo.

CONTINENTAL TECHNOLOGIES held a celebration and a ribbon cutting Friday. Cutting the ribbon is owner Paul Grimmer, of Boulder, Colo. Pictured are Craig Stephenson, City Manager; Doug Jack, Vice President of Technology Continental Technologies (and Eltron); Stephen Marquardt, BIS Coordinator Pioneer Tech; and Jason Jones. On the second row starting from left, Cody Moyer, Ken York, Todd Harkins, Manager Continental Technologies; Glenda Grimmer, Owner; Paul Grimmer, President and Owner; Carl Johnston; Darrin York; and Ann Thornburgh.
